

**IN THE CLAIMS:**

The following is a complete listing of claims in this application.

Claims 1-2 (canceled).

3. (previously presented) The device according to claim 7 wherein the dye has a complementary color to the color of light transmitted through the transparent resin for a desired color of light.

Claims 4-6 (canceled).

7. (currently amended) An LED device comprising:  
an LED mounted on a substrate;

a transparent resin sealing the LED, the transparent resin including phosphor particles distributed therein for changing a chromaticity of light emitted from the LED to another chromaticity, based upon a chromaticity of the light emitted from the LED; and

an exposed peripheral portion of the transparent sealing resin including a permeated dye, for

~~wherein the permeated dye is specifically selected to correct~~ correcting the color of the light transmitted through the transparent resin including phosphor particles and sealing the LED.

8. (previously presented) The device according to claim 7, wherein the LED device is for producing white light.

Claim 9 (canceled).

10. (previously presented) The device according to claim 7, wherein the dye is a color which is complementary to the color of the light transmitted through the transparent resin.
